

COVID19 SAFETY POLICY

At Dunrite Concrete Equipment & Accessories, we are committed to the safety of our customers, employees, vendors and community at large. We want to assure you that we will strive to maintain business as usual during these uncertain times, with a focus on health & safety.

We are working hard to maintain a clean safe work environment for our customers and the Dunrite team. Our team has made many adjustments to stay open and be here in order to serve your supply needs. We are encouraging all customers to call in as much as possible with any requests, questions, or orders. This will reduce face time in the showroom and minimize contact for all of us. We ask that you please help us continue to be healthy and safe so we can continue to provide the service needed by the construction industry.

We want to encourage all of our customers to call in orders when possible. This will allow both you as our customer and our team here at Dunrite to minimize contact whenever possible. We can load you up curbside if you are on a net 30 account or if you can make payment at the time of order through email money transfer. We will continue to adapt and find ways to be able to safely get you the products you need in order for you to keep your jobs running on schedule and keep your customers happy.

We hope everyone can continue to follow the mandated protocols and stay healthy in these challenging times. If you have any questions about products or how to get them please feel free to call in and we would happy to help you out the best we can.

At Dunrite, we have implemented the following steps.

- We have a stringent cleaning policy that we follow throughout each day
- We have posted safe hand washing protocol in all of our rest rooms
- We have been spreading out our staff to minimize close contact
- We have set up a system where we can deliver your pre-paid purchased goods into your vehicle for you
- We ensure at the start of each day that none of our staff are experiencing any symptoms of the Covid19 virus

If you have a fever, cough, difficulty breathing, have you travelled outside of Canada to an at risk area or come in contact with someone who was suspected or confirmed to have the Novel Coronavirus in the last 14 days. We urge you to follow the steps listed by CDC and help us prevent the spread of COVID19
