dustlesstools.com

The DustDroid™ 300 Industrial DustlessVac™ includes a HEPA filter designed for capturing extra fine dust created by cutting, drilling, grinding and sanding materials. It produces 250 CFM and features a wheeled, 30-gallon tank that is easily emptied.

This workhorse vacuum has fewer moving parts, and no solenoids, requiring less maintenance and providing more reliable performance.

#### Works with the following combinations of equipment:

- 1 large walk behind polisher (30" diameter and above, that are shrouded well - rubber, not metal)
- 1 small to medium walk behind grinder (7" to 29" diameter)
- 3 hand grinders (depending on hose diameter)
